

## # Command line - common flags

- a → all (eg. `ls -a` shows hidden files)
- l → long (eg. `ls -l` shows more detail)
- d → (e.g. `ls -d` lists only directories)
- r → recurse (eg. `rm -r` remove directories)
- i → confirm if issue (eg. `rm -i` forces yes/no confirmation)

Note:

Flags can be combined

e.g. `ls -al` or `ls -la`

Flags have different meanings depending on context (eg. `-d` can be debug or directory)
